

SIMPLE. STABLE. CONTRARIAN.

ALLAN GRAY AUSTRALIA STABLE FUND

To meaningfully outperform cash, you need to be invested in growth assets, but some investors don't want to take on much more risk than a term deposit. That's where the Allan Gray Australia Stable Fund can help. The Fund aims to outperform the Reserve Bank of Australia cash rate over the long term by investing predominantly in cash, but can boost returns by investing no more than 50% in the Australian share market. Rather than holding complicated investments, it's simply a cash-heavy fund that invests in shares when the opportunity is right. So you can help your clients outperform cash without exposing them fully to the volatility of investing in shares alone.

WHY CHOOSE THE ALLAN GRAY AUSTRALIA STABLE FUND?

A LOWER-RISK WAY TO ACCESS SHARE MARKETS

We strongly believe investors need to be invested in shares for the best long-term returns, but not everyone is comfortable with the volatility this can bring. By investing predominantly in cash with selected exposure to the share market, the Allan Gray Australia Stable Fund enables your clients to potentially outperform cash with less risk than investing in the share market alone. Exposure to shares will never exceed 50% of the portfolio and has historically remained at around 30% since the Fund's inception.

TO OUTPERFORM CASH WITH A LOW-COMPLEXITY FUND

We don't believe that beating cash should be complicated. This is why the Allan Gray Australia Stable Fund does not employ complex strategies such as long/short trading, options or derivatives. It simply invests in cash and term deposits, and has limited exposure to selected domestic shares.

OUR CONTRARIAN APPROACH IS WELL REGARDED

Our investment philosophy is simple – we take a contrarian approach, apply it consistently and invest for the long term. To give investors the benefit of this approach, our Stable Fund still incorporates our contrarian share ideas that we use in our Equity Fund while prioritising our long-term fundamental analysis.

A LOW-VOLATILITY STABLE FUND

The Fund traditionally has lower volatility than other funds offering equity exposure because it is predominantly invested in cash. And while our selective exposure to shares gives investors the potential to generate higher returns than cash, the Fund has much less volatility than a pure equity fund. Volatility is also reduced as a result of our contrarian approach, as its inherent countercyclical behaviour means we invest more in shares when we believe they are undervalued, then we reduce exposure as the market rises and we see less value. This helps to drive long-term real (above inflation and cash) returns, while seeking to reduce the impact of major market falls.

ALLAN GRAY AUSTRALIA STABLE FUND PORTFOLIO WEIGHTINGS

Source: Allan Gray as at 31 March 2020

This chart shows how the Fund's share exposure has generally increased as the market falls, and decreased as the market rises. The Fund's counter-cyclical helps reduce volatility. The S&P/ASX 300 Price overlay illustrates how the Fund's exposure to ASX-listed securities has changed as the share market has fluctuated.

HOW CAN I USE THE FUND?

AS A SIMPLE ALTERNATIVE TO CASH WITH POTENTIAL FOR BETTER RETURNS

The Allan Gray Australia Stable Fund can be a great option for those clients looking to preserve their purchasing power but with a desire to generate more returns than cash offers. Its cash-plus objective and limited exposure to shares may outperform cash over the long term.

TO SUPPLEMENT AN INCOME

Some clients in the pension phase look for stable funds to park cash in, ready to cover pension payments if their regular income falls.

FOR CONSERVATIVE INVESTORS WANTING SOME STABILITY

For clients who are averse to losing capital but want potentially higher returns than cash, the Fund provides a more defensive option. By limiting exposure to shares to 50% of the Fund's assets, investors have exposure to the market without being fully invested. For those who are concerned about shares being expensive but don't want to be out of the market, the Fund provides a good option, by investing predominantly in shares when they are undervalued, and reducing exposure when they are expensive.

TO SIT AND WAIT

The Fund can be used to park money while waiting for an opportunity to invest fully in the share market, or for medium-term savings. For example, some investors use the Fund to save for a house deposit or between selling one property and buying another (with a two-year-plus view). By looking to provide a higher return than cash, the Fund may help your clients retain purchasing power.

FEATURES AT A GLANCE

A more conservative investment that aims to outperform cash and boost returns by blending cash with selected Australian shares.

APIR code:	ETL0273AU	INVESTMENT APPROACH: The Allan Gray Australia Stable Fund starts with at least 50% of its portfolio invested in cash and money market instruments. The remainder is invested in carefully selected Australian shares when the opportunity arises. It aims to outperform cash over the long term but with less volatility than the Australian share market. Using the same contrarian philosophy as all our Funds, the Stable Fund buys shares when they are undervalued and therefore a good opportunity, with the aim to benefit when their value is recognised, they become popular and their price rises.
ASX mFund code:	AQY02	
Management costs:	Base fee of 0.25% p.a. plus 0.20% performance fee	
Buy/sell spread:	0.10%/0.10%	
Distribution frequency:	Quarterly	
Inception date:	1 July 2011	
Minimum suggested time frame:	Two years or longer.
